SECTION 1: PROMPT

Create a **one-page modern and professional resume** using the following details. Use a clean, minimalist layout with clear section headings, proper spacing, and a well-structured format suitable for an entry-level Mechanical Engineering student.

Name: Denzel Lysander E. Cua
Email: dcua@addu.edu.ph
Phone: 0995 892 3020

Objective:
Motivated Mechanical Engineering student seeking opportunities to apply technical drawing and AutoCAD skills while gaining hands-on experience in engineering and design.

Education:
Bachelor of Science in Mechanical Engineering
Ateneo de Davao University
2024 – Present

Senior High School – STEM (Science, Technology, Engineering, and Mathematics)
STI College Tagum Inc.
Apokon Road, Brgy. Apokon, Tagum City, Davao del Norte
2022 – 2024

Junior High School
Tagum National Trade School
Apokon, Tagum City, Davao del Norte
2018 – 2022

Elementary
Tagum You Xiu School
Apokon, Tagum City, Davao del Norte
2012 – 2018

Skills:

- Technical Drawing and Drafting
- AutoCAD (Basic to Intermediate)
- Basic Machining Skills
- Team Collaboration
- Ability to Work Under Pressure
- Attention to Detail

Projects/Experience:

- Completed modern technical drawing projects demonstrating precision and accuracy
- Produced basic AutoCAD designs and layouts
- Performed machining of basic objects in a machine shop setting
- Applied drafting principles in school-based technical projects

Formatting Instructions:

- Keep it **one page only**
- Use a **modern, minimalist design**
- Emphasize **readability and professionalism**
- Use **bold headings and consistent spacing**
- Make it suitable for **internship or entry-level job applications**

SECTION 2: LLM Outputs

LLM #1 - Gemini AI

Denzel Lysander E. Cua

Email: dcua@addu.edu.ph | **Phone:** 0995 892 3020 | **Location:** Davao Region, Philippines

---

OBJECTIVE

Motivated Mechanical Engineering student seeking opportunities to apply technical drawing and AutoCAD skills while gaining hands-on experience in engineering and design. Dedicated to delivering high-quality results in a professional engineering environment.

EDUCATION

Bachelor of Science in Mechanical Engineering | 2024 – Present *Ateneo de Davao University*

Senior High School – STEM | 2022 – 2024 *STI College Tagum Inc. Tagum City, Davao del Norte*

Junior High School | 2018 – 2022 *Tagum National Trade School*

TECHNICAL SKILLS

- **Engineering Design:** Technical Drawing and Drafting, AutoCAD (Basic to Intermediate)
- **Fabrication:** Basic Machining Skills, Machine Shop Operations
- **Soft Skills:** Team Collaboration, Attention to Detail, Ability to Work Under Pressure

---

PROJECTS & EXPERIENCE

Technical Drawing & CAD Portfolio

- Executed modern technical drawing projects with a focus on geometric precision and accuracy.
- Developed basic AutoCAD layouts and designs for academic engineering assignments.
- Applied fundamental drafting principles to ensure standardized technical documentation.

Machine Shop Operations

- Successfully performed machining of basic objects using various shop tools.
- Maintained safety protocols and equipment standards in a workshop environment.
- Gained practical understanding of material properties through hands-on fabrication tasks.

CERTIFICATIONS & ACHIEVEMENTS

- **STEM Graduate:** Successfully completed the Science, Technology, Engineering, and Mathematics strand with a focus on pre-engineering fundamentals.
- **Technical Proficiency:** Demonstrated consistent accuracy in school-based drafting and design projects.

LLM #2 - Claude AI

DENZEL LYSANDER E. CUA

dcua@addu.edu.ph | 0995 892 3020 | Davao City, Philippines

OBJECTIVE

Motivated Mechanical Engineering student seeking opportunities to apply technical drawing and AutoCAD skills while gaining hands-on experience in engineering and design.

EDUCATION

Bachelor of Science in Mechanical Engineering — 2024 – Present
Ateneo de Davao University

Senior High School – STEM — 2022 – 2024
STI College Tagum Inc.
Apokon Road, Brgy. Apokon, Tagum City, Davao del Norte

Junior High School — 2018 – 2022
Tagum National Trade School
Apokon, Tagum City, Davao del Norte

Elementary — 2012 – 2018
Tagum You Xiu School
Apokon, Tagum City, Davao del Norte

SKILLS

- Technical Drawing and Drafting
- AutoCAD (Basic to Intermediate)
- Basic Machining Skills
- Team Collaboration
- Ability to Work Under Pressure
- Attention to Detail

PROJECTS & EXPERIENCE

- Completed modern technical drawing projects demonstrating precision and accuracy
- Produced basic AutoCAD designs and layouts
- Performed machining of basic objects in a machine shop setting
- Applied drafting principles in school-based technical projects

Section 3: Comparison Table

Criteria	LLM #1	LLM #2
Structure	More detailed and logically organized. Includes additional sections like *Certifications & Achievements* and separates experience into categories.	Well-structured with clear sections (Objective, Education, Skills, Projects). Uses a clean hierarchy and balanced layout.
Clarity	More descriptive but slightly longer, which may reduce quick readability.	Easy to scan quickly due to shorter bullet points and concise phrasing.
Formatting	Plain formatting (likely Word-based). Lacks visual hierarchy and design elements.	Strong visual appeal (header, spacing, alignment, columns). Looks professional and polished.
Overall Quality	More complete and content-rich but less visually appealing.	Clean, professional, and visually impressive but slightly lacking in depth.

Section 4: Reflection

Between the two LLMs I used, I think Claude AI performed better than Gemini AI because it was easier to read and understand. The output from Claude AI was more organized and visually clear, so I could quickly remember the important details. On the other hand, Gemini AI produced a more text-heavy resume that had the same information but was harder to scan and not as easy to follow. Because of this, I preferred Claude AI since it presented the resume in a cleaner and more structured way. I also noticed that the differences between the two were mostly in how they presented the information, not really the content itself. In improving my final resume, I focused on making the structure better and cleaning up the details so it looks more professional. I arranged the information properly, removed unnecessary words, and made sure everything is clear and easy to read. From this activity, I learned that prompting is very important because you need to think carefully about what you want the AI to produce. A good prompt should be clear and specific so the output will also be better. I also realized that you need to understand what you are asking for in order to guide the AI properly. Overall, I learned that small changes in how you prompt can lead to very different results.

Section 5: Refined Output

DENZEL LYSANDER E. CUA

📧 dcua@addu.edu.ph | 📞 0995 892 3020 | 📍 Davao Region, Philippines

OBJECTIVE

Motivated Mechanical Engineering student seeking opportunities to apply technical drawing and AutoCAD skills while gaining hands-on experience in engineering design and fabrication. Committed to producing accurate, high-quality work in a professional engineering environment.

EDUCATION

Bachelor of Science in Mechanical Engineering
Ateneo de Davao University | *2024 – Present*

Senior High School – STEM
STI College Tagum Inc., Tagum City, Davao del Norte | *2022 – 2024*

Junior High School
Tagum National Trade School | *2018 – 2022*

TECHNICAL SKILLS

Engineering Design:

- Technical Drawing and Drafting
- AutoCAD (Basic to Intermediate)

Fabrication:

- Basic Machining Skills
- Machine Shop Operations

Soft Skills:

- Team Collaboration
- Attention to Detail
- Ability to Work Under Pressure

PROJECTS & EXPERIENCE

Technical Drawing & CAD Portfolio

- Executed technical drawing projects with strong emphasis on geometric precision and accuracy
- Developed AutoCAD layouts and designs for academic engineering requirements
- Applied standard drafting principles to produce clear and professional technical documents

Machine Shop Operations

- Performed machining of basic components using standard workshop tools and equipment
- Followed safety protocols and maintained proper handling of machines and materials
- Gained practical understanding of material properties through hands-on fabrication

CERTIFICATIONS & ACHIEVEMENTS

- STEM Graduate with focus on pre-engineering fundamentals
- Recognized for consistent accuracy and quality in drafting and design projects

ADDITIONAL INFORMATION

- Willing to learn and adapt to new engineering tools and technologies
- Open to internships, training, and entry-level engineering opportunities
